

We invite entries from all purebred Aussies, no matter their geographic location or registry. The more dogs that are enrolled in this survey, the more useful it will be to the breed. If you want to know more about it before you decide to participate, check out the FAQs page: <http://www.ashgi.org/Survey%20FAQs%20090827.htm>

The survey is open to dogs born from 1990 to 2005. Access is via ASHGI's home page www.ashgi.org. Paper copies are available by request: 4_survey@ashgi.org or 559 485-2136. The survey will run for at least a year with a minimum goal of 500 entries. Because of the detailed nature of the survey, you should have your dog's health information and breeding records available before you begin.

This survey was developed in cooperation with the Health and Genetics Committee chairs of both ASCA and USASA as well as the health liaison for the ASC Netherlands, an FCI club.
